Q-AXT68-1

Complete with

Specification

Flow 11.00 ltr/min
Max tip 0.052"
Pump ratio 68:1
Displacement 180 cc
Max input pressure 6.3 bar | 90 psi
Weight 101.0 kg

Features

Built tough to cope with tough environments - workshops, fabrications facilities, shipyards, bridges
Easily handle high volumes of most protective and corrosion control coatings including intumescent and two-packs
Tried and trusted air motor technology is combined with extreme engineering to ensure a capacity to work hard, all day, every day
